

The Stanger® C Circular Breast Retractor

For Initial Surgery and Placement of a Prosthesis Allowing a Conservative Sized Incision.

For Easy Removal and Replacement of Implanted Breast Prostheses.

- Designed to **create an Optical Cavity** in the breast pocket through a small incision.
- Facilitates visualization for **better hemostasis** in the breast pocket.
- A Retractor that provides **better visualization** for dissection of the periphery of the pocket.

Elevated breast pocket with implant in place.
