## CHIU LIGHTED RETRACTOR FOR CARPAL TUNNEL

- **The Chiu Lighted Retractor for Carpal Tunnel Decompression with a Strategically Arched Long Thin Blade** is designed to provide direct visualization of the Subcutaneous Plane, the Palmer Fascia, Palmaris Brevis, Transverse Carpal Ligament, Median Nerve and the entire content of the Carpal Tunnel via a limited incision of about 3cm.
- **The direct visualization ensures safety, accuracy and completeness** of decompression with a scalpel through the archway so provided by the protective blade.
- **The limited skin incision minimizes scarring** and obviates the possibility of damaging the cutaneous branches of the Palmer Cutaneous Nerve and simplifies the procedure of Median Nerve Decompression.
- **The Retractor is also designed to allow ready exploration** of the Medial Intramuscular Septum and the Internal Brachial Ligament for complete Ulnar Nerve Decompression at the Cubital Tunnel Level.
- **It is also effective in facilitating fasciotomy for anterior compartment syndrome.**
